**Biosafety Level 2** is suitable for work involving agents that pose moderate hazards to personnel and the environment. It differs from BSL-1 in that 1) laboratory personnel have specific training in handling pathogenic agents and are supervised by scientists competent in handling infectious agents and associated procedures; 2) access to the laboratory is restricted when work is being conducted; and 3) all procedures in which infectious aerosols or splashes may be created are conducted in biological safety cabinets (BSCs) or other physical containment equipment.

The following standard practices, special practices, safety equipment, and facility requirements apply to BSL-2. Please check all that apply.

<b>Access Control</b>
<input type="checkbox"/> Access to laboratory is controlled with doors and sealed windows present. <input type="checkbox"/> All persons entering the laboratory are advised of entry/exit requirements through training and signage, with hazards and responsible parties' information posted. <input type="checkbox"/> Policies are in place to prevent consumption of food/beverages. <input type="checkbox"/> Personal protective equipment is provided to employees and visitors. Please list the types of PPE (select all that apply): <ul style="list-style-type: none"> <li><input type="checkbox"/> Laboratory coat/gown</li> <li><input type="checkbox"/> Eye/face protection</li> <li><input type="checkbox"/> Gloves</li> <li><input type="checkbox"/> Respiratory protection</li> <li><input type="checkbox"/> Safety shoes</li> </ul>
<b>Training</b>
<input type="checkbox"/> Are laboratory personnel trained prior to assuming their duties and on an annual basis? Are they trained on a laboratory specific biosafety manual that includes PPE, minimization of splashes, hand washing, sharps and spill training? <input type="checkbox"/> Does your organization have an occupational health and medical surveillance program in place which offers appropriate immunizations for the materials handled? Is training provided to employees on this program?
<b>Equipment and Facilities</b>
<input type="checkbox"/> Are decontamination equipment/procedures in place for the decontamination of surfaces, equipment, and waste? Please list all methods of waste disposal (check all that apply): <ul style="list-style-type: none"> <li><input type="checkbox"/> Chemical Inactivation</li> </ul>

- Autoclave – onsite/contractor
- Incineration – onsite/contractor
- Are the appropriate sharps containers provided for the laboratories?
- Are hand washing facilities provided in the laboratories? Is an eyewash station available?
- Is laboratory furniture provided that is designed for easy cleaning and made of appropriate material to withstand the laboratory work being performed?
- Are facilities kept free from accumulations of rubbish, unwanted materials and objects that present hazards from tripping, fire, explosion and harbourage of pests?

Biosafety cabinets (BSC) are required for the manipulation of BSL 2 or higher infectious materials. Please indicate the BSC type and certification schedule:
